

REALIZE

**business continuity
through virtualization.**

Discover how to protect your business-critical IT infrastructure through virtualization. Join HP and Microsoft® for a business continuity workshop.

Your company logo here

HP, Microsoft and Company Name present a business continuity workshop.

Join us for a business continuity workshop and discover how you can achieve powerful benefits with the combination of Microsoft® virtualization and HP storage solutions.

HP has teamed up with Company Name to help you realize business continuity through virtualization. Key takeaways from the workshop will include:

- How you can handle various component and site failures
- The virtualization components of Microsoft Windows® Server 2008 R2 that enable business continuity
- The built-in high-availability and disaster-recovery capabilities of the HP P4000 Multi-Site SAN storage infrastructure
- How to cost-effectively implement and manage this easy-to-configure joint solution
